# Project Management

Year after year, Maritime International's experienced staff of engineers and project managers have successfully executed complex fabrication projects delivered around the world. This unique blend of technical and practical 'hands on' experience allows MI to offer clients creative solutions that often result in significant time and cost savings.

Since the first project, MI has followed a disciplined system of planning, engineering submittals/approvals, document control, drawing, milestone, and resource management, as well as complete transparency to our clients. These project management fundamentals have allowed MI to set itself apart by assuring that project schedules are kept so that our clients can always depend on our production meeting their expectations. Whether it is safety, quality, material traceability, production, or delivery time, our mission is to precisely manage every facet of every project at the highest levels our clients have come to expect.

## Facility Features

Maritime International's heavy fabrication facility is located in South Louisiana near the Gulf of Mexico. Our proximity to the Ports of New Orleans and Houston provides our domestic and international clients with economical transportation venues.

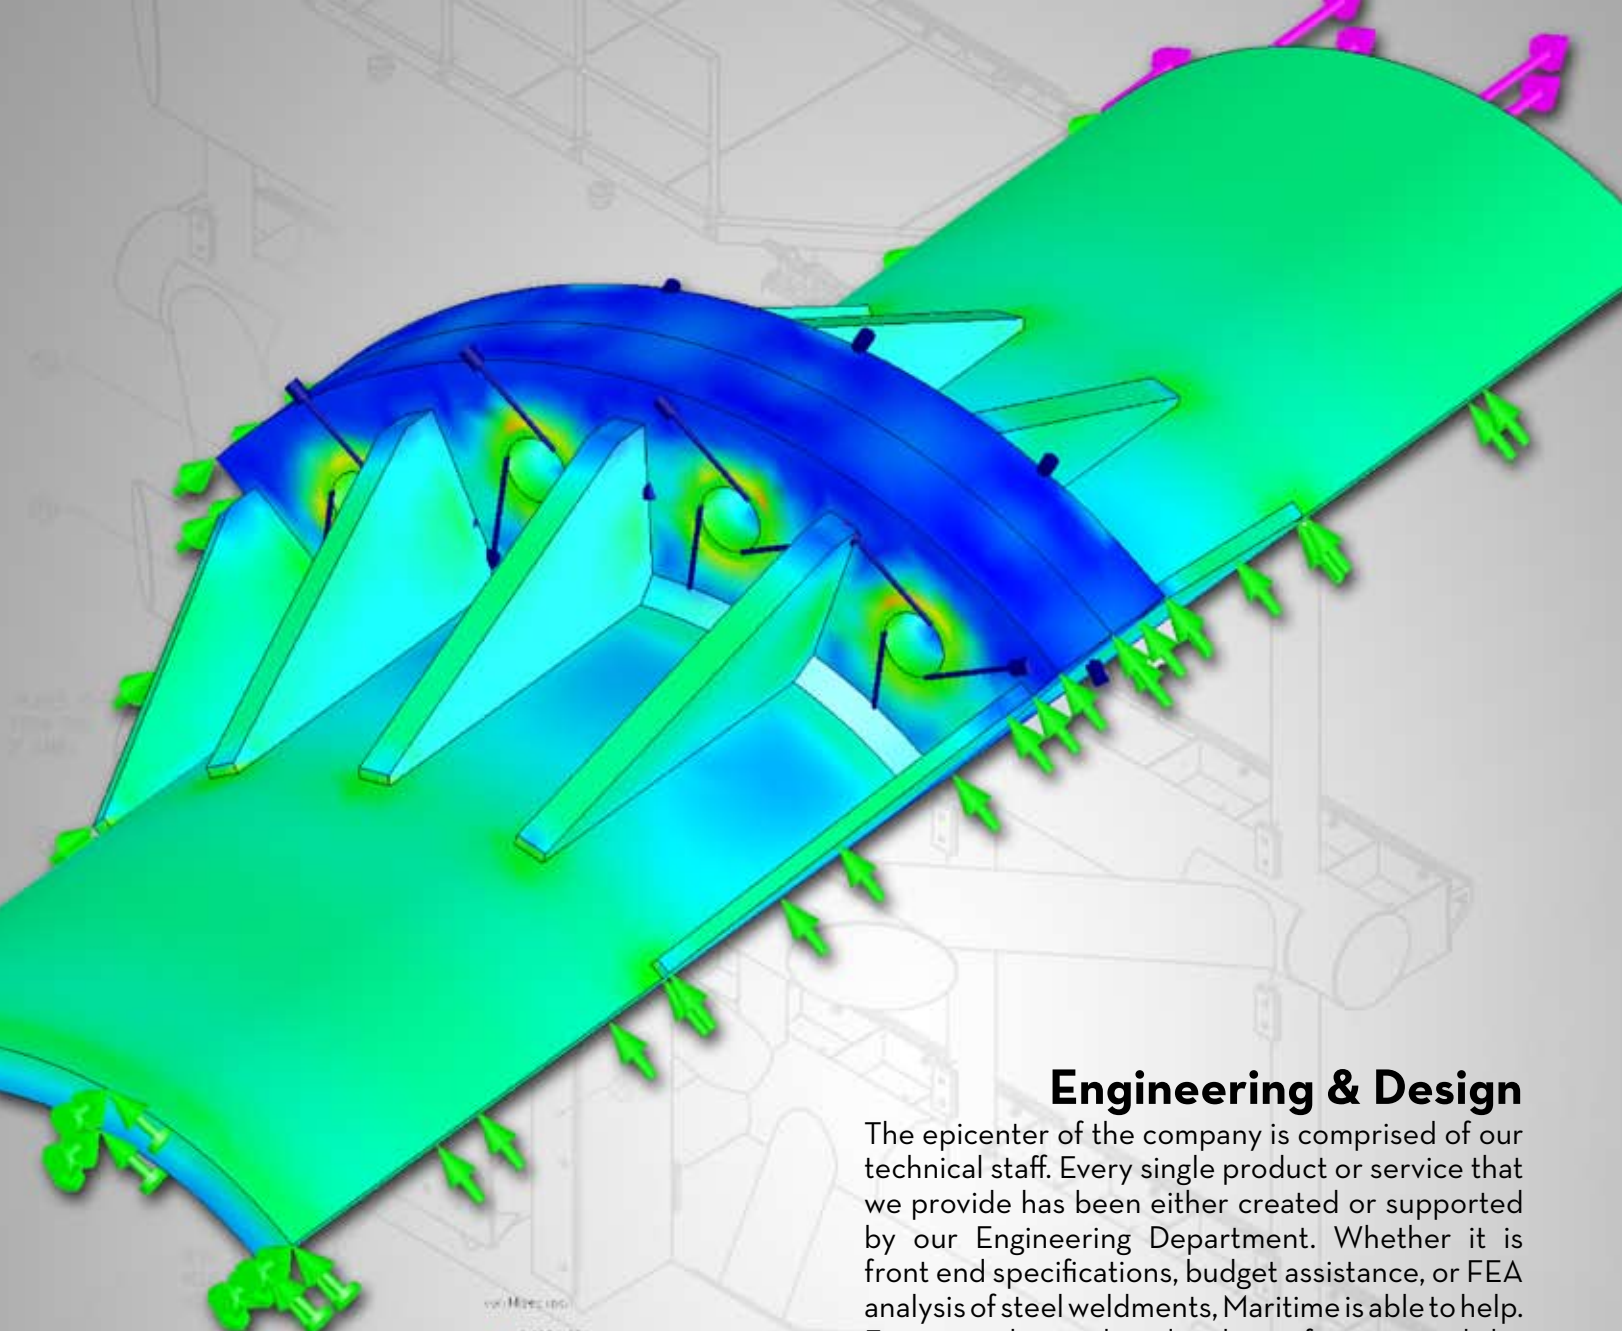

- Twenty seven (27) acres of industrial property near US Highway 90
- Seventy (70) ton lifting capacity
- Ten (10) workstation jib cranes
- Seven (7) acres of stabilized yard
- CNC plasma and oxy fuel plate processing system
- Indoor sensitive item warehouse
- Forty foot bay doors.
- Two (2), eighteen (18) ton forklifts and multiple smaller lifts
- Thirty two (32) inch vertical band saw with in-feed and out-feed roller system
- Semi-Automated pipe cutting
- Semi-Automated welding equipment
- Aluminum welding equipment
- Stud Welding equipment
- Sub-arc welding equipment
- Heavy power rollers and idlers

## Services

Maritime International is a leading fabricator located in the heart of the US oil & gas and marine industries. Our growth and success are attributable to the vast range of services offered to our clients. Primarily, our ability to provide in-house technical services has enabled the company to compete at the highest level.

In addition to a large, well equipped and staffed workshop, Maritime provides a unique blend of services which are necessary to compete in a global market. Some of these services are as follows:

- Design Engineering (structural and mechanical)
- Drafting (AutoCADD, Solidworks)
- Finite Element Analysis
- Buoyancy Analysis (GHS)
- Quality Assurance and Control
- Project Planning
- HSE
- Documented Procedures and Qualifications
- Material Optimization
- Material traceability.
- Qualified procedures and qualifications (AWS D1.1 and ASME B31.3)
- Dynamic tensile and axial test equipment
- Well trained, safe, and efficient workforce
- On-site final fitting and welding capability

## Engineering & Design

The epicenter of the company is comprised of our technical staff. Every single product or service that we provide has been either created or supported by our Engineering Department. Whether it is front end specifications, budget assistance, or FEA analysis of steel weldments, Maritime is able to help. For more than a decade, clients from around the world have utilized our technical expertise to save money and increase efficiencies. Our global staff of engineers and designers provide our clients with economical solutions through innovative design work. We recognize the importance of clearly listening to our clients needs before advising them with an engineered solution. This perspective provides our business partners with a high level of confidence in Maritime's design capabilities, and it is this philosophy that has resulted in a substantial rate of repeat customers for the company.

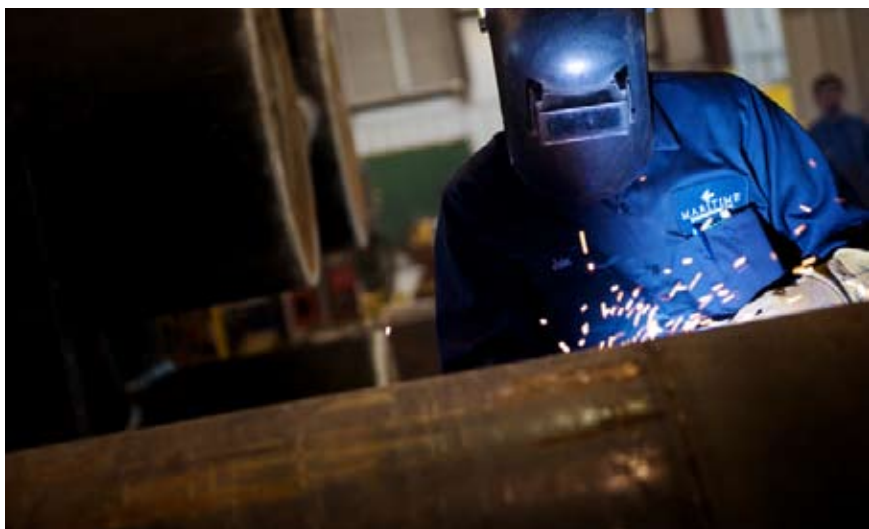

## About Maritime International

The people who built the company, forms the framework of the core of Maritime International (MI). Service, Quality, Safety, Hard Work, Attention to Detail, and a commitment to continuous improvement.

MI is bolstered by owners, who are active in daily operations, a management team of seasoned technical professionals with domestic and international experience covering a variety of markets. This team is further supported by a strong group of multi-disciplined departments including design/project engineers, QA/QC managers, draftsmen, marketing, customer service, administration, logistics, production, and a large team of experienced fabricators. With offices around the world, MI personnel are available within every time zone of the world further enhancing our ability to support clients in any of their fabrication projects.

With a full front office staff, MI is able to undertake projects requiring the type of technical support not commonly found amongst fabricators. MI's track record has enabled it to serve the most demanding clients around the world on a host of projects amongst various industries from transportation, marine, oil and gas, and civil construction.

All of us at Maritime International hope to have an opportunity to showcase our many strengths and capabilities on your next fabrication project.
